

The 25th ZESTY Network Seminar

Thursday 15 March 2018, 17:00-19:00

5F Auditorium, Chemistry Main Bldg.

Free of Charge, no registration required

Oral Presentation (17:00-18:00)

Olaf STEFANCZYK (Ohkoshi Lab.)

Synthesis and characterisation of chiral $\text{Ln}^{\text{III}}\text{-[W}^{\text{V}}(\text{CN})_8]$ molecular magnets showing second harmonic generation phenomenon

Manuel E. OTERO-RAMIREZ (Suga Lab.)

RaPID ways for the discovery of novel cancer therapy approaches

Michitaka FUKUMOTO (Hasegawa Lab.)

Investigation of electronic transport properties of Ta-doped SnO_2 thin films

Short Talk Given by Poster Presenters (18:00-18:15)

Mixer & Poster Presentation (18:15-19:00)

Takahiro SUZUKI (Yamanouchi Lab.)

Ion trap time-of-flight mass spectrometry on photodissociation of $[\text{Ar-N}_2]^+$ induced by ultrashort near-IR laser fields

Angelina FRANK (Goda Lab.)

Gigahertz Dual-comb interferometer towards high-speed two-photon tomography

Satori KOWASHI (Nakamura Lab.)

Kinetic and Mechanistic Study on Dimerization Reaction of $\text{C}[60]$ by Atomic-Resolution Real-Time Electron Microscopic Imaging

Ryo SHIOTSUKI (Nishihara Lab.)

Liquid/liquid Interfacial Synthesis of a Click Nanosheet

Koichi NAGATA (Shionoya Lab.)

Activation of Dihydrogen by Masked Doubly Bonded Aluminum Species

Tomas Feliksas GUTOROVAS (Ozawa Lab.)

A phytochrome optotool to investigate the endocytosis of 7TMRs
